

ORKA 350

HOMELIFT

WHY A HOME LIFT?

Comfort

It can be operated by pressing the button, both in the cabin and on the landings. Choosing the version with automatic sliding or folding doors in the car, you will not have to hold the button pressed during the entire travel.

Reduced spaces

Orka 350 StairFit is our compact model created to be installed in limited spaces and ideal for staircases with particularly reduced width. Each lift is made to measure in order to take advantage of every single centimetre available.

Safety

Thanks to the wide range of specific devices you can move every day around the house without worries.

Style

Decorate the space in motion by choosing the finishes that best suit your environments and satisfy your taste as you would do for any furnishing accessory. Our renewed range of cabins, Smart - Idea - Style and Opera, best represents the expression of MADE IN ITALY.

Small elevators for private homes and public environments

Our products find their natural connotation mainly in private homes to help you live fully your environments.

Masonry shaft or metallic structure

The lift travels inside a shaft to guarantee the maximum safety, according to the law. The shaft can be obtained inside the house making it in masonry or concrete.

Swing doors or automatic doors

As standard, Orka 350 and Orka 350 StairFit lifting platforms are offered with swing glazed doors that guarantee maximum visibility and passive safety.

STRENGTH AND RELIABILITY

Orka 350 means reliability and safety. Thanks to the hydraulic traction, to the solid structure and to the safety devices (blackout emergency descent, automatic rescue call and much more) you will never have to fear of being stuck in the cabin.

TOP COMFORT AT THE BEST PRICE

Orka 350 is the mini-lift for those who don't accept compromises. Top comfort and quietness, smooth starts and stops, great lighting and best technologies create the best travel experience in the category.

LIVING SPACE

The new range shows a completely renewed line of cabins, with a clean and essential design which will give your house an unmistakable touch of elegance.
